QA3 EMERGENCY TROLLEY SYSTEM: Four new models to choose from

QA3
Emergency Trolley

QA3
Emergency Trolley

Specially designed for Emergency Departments with radiolucent platform, offering exceptional X-ray access as well as a medirail and K8 pressure care mattress.

Description	Code
QA3 Emergency Trolley with Radiolucent Platform	21120

QA3
DRIVE
Emergency Trolley

QA3 DRIVE
Emergency Trolley

Featuring inbuilt motorised drive – operated by innovative touch-sensitive pushing handles: controlled, effortless travel up to gradients of 10°

Description	Code
QA3 DRIVE Emergency Trolley with Radiolucent Platform	21122

QA3
Emergency Trolley

QA3
Powered ⚡ Emergency Trolley

Electrically powered positioning raises or lowers trolley platform or backrest – effortlessly. Special feature swiftly returns trolley to horizontal, optimal height position for CPR treatment.

Description	Code
QA3 Powered Emergency Trolley with Radiolucent Platform	21126

QA3
DRIVE
Emergency Trolley

QA3 DRIVE
Powered ⚡ Emergency Trolley

Top of the range model: combines all features of the Standard, DRIVE and Powered trolleys – the complete answer for moving and positioning patients as easily as possible.

Description	Code
QA3 DRIVE Powered Emergency Trolley with Radiolucent Platform	21124

Combining industry knowledge with innovative technology

Designed and produced at our UK manufacturing facility using the latest engineering techniques

Manufacturer, designer and supplier of high quality medical equipment around the world

STANDARD FEATURES

QA3
Emergency Trolley

QA3//DRIVE
Emergency Trolley

QA3
Powered Emergency Trolley

QA3//DRIVE
Powered Emergency Trolley

Specially designed QA3 Emergency Trolley features a radiotranslucent platform, exceptional X-ray access and low height capability. Comes complete with a medirail and the K8 pressure care mattress.

With maximum patient comfort built in, the trolley is supremely manoeuvrable, compact, light weight and robust. All Emergency trolleys are fitted with two fixed transfusion poles and a medirail.

Trendelenburg tilt

extremely smooth and controlled mechanism, even at lowest height

Vertically operated side rails

store away under mattress for a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation

5th wheel steering

unique mechanism ensures maximum manoeuvrability and easily guided by one person

Patient comfort

exceptional low height capability and store away side rails allow easy mount/dismount particularly for frail and elderly patients. Wide patient platform and pressure care mattress for patient comfort. Optimum ground clearance for patient hoist access

Pushing handles

four ergonomically positioned pushing handles for supreme manoeuvrability

Gas assisted backlift

unique design, precision controlled, easy lift system for enhanced user and patient comfort

Infection control

smooth moulded surfaces and acrylic capped vac formings enclose trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design for easy cleaning

Castors

polyurethane tyres offer low rolling resistance for high manoeuvrability, 150mm castors fitted as standard, 200mm optional

Cylinder trough

side loading for ease of access, suitable for wide range of cylinder options including F, E or CD

K8 pressure care mattress

manufactured from temperature-sensitive gel feel foam that moulds to the patient's body shape, relieving pressure by distributing the load as evenly as possible. Outer material is anti-microbial, water resistant, vapour permeable and latex free

X-ray translucent platform

full length radiotranslucent platform, suitable for digital or traditional plates

Two fixed transfusion poles

fitted as standard: innovative quick release safety locking mechanism, integrates into either head or foot end of side rails for easy access and storage

Hydraulic lift mechanism

exceptional low height capability, adjusted by independently operating pedals on both sides of trolley

Special bariatric version of this model also available – see page 10

Motorised **DRIVE** FEATURES

QA3
Emergency Trolley

QA3 **DRIVE**
Emergency Trolley

QA3
Powered Emergency Trolley

QA3 **DRIVE**
Powered Emergency Trolley

Inbuilt motorised drive offers effortless movement combined with ultimate control.

Because people and therefore patients are getting larger, it's crucial that we take moving and handling issues into account, giving practitioners a trolley on which patients can be moved and positioned as easily as possible.

The introduction of our new touch-activated, motorised DRIVE feature offers a major enhancement in a trolley that already has ease of use, practicality and patient comfort built in.

The trolley can also be used in traditional fifth wheel steer mode.

DRIVE handles

innovative touch sensitive design: simply press against the pop-up or fixed yellow pushing handles, and the trolley will move forward; pull back on them, and it will reverse; let go and it will stop

Effortless travel up to gradients of 10°

Inbuilt motorised drive

no need to push or pull the trolley: our new, inbuilt motorised DRIVE feature linked to the trolley's 5th wheel, offers controlled, effortless travel up to gradients of 10°

Long-life battery – 22 kilometers on a single charge

DRIVE feature powered by advanced nickel-metal hydride rechargeable battery

Highly accurate battery charge indicator – rapid charge

QA3 // // // DRIVE
Powered ⚡ Emergency Trolley

Another option developed to help minimise risks for practitioners dealing with increasing patient weights is powered positioning.

With these models, either the whole trolley platform or the backrest can now be raised or lowered electronically from the panel at the foot end.

There's also a special CPR feature: return the trolley swiftly to a horizontal, optimal height position for CPR treatment, at the touch of a button.

Electrically Powered Functions
easy to operate using the positive feel push button controls on a panel at the foot of the trolley
Manual override systems as standard

Platform height – electrically powered raise and lower mechanism

Offers smooth movement to position the trolley at any point in its height range – 535mm to 835mm (excluding mattress)

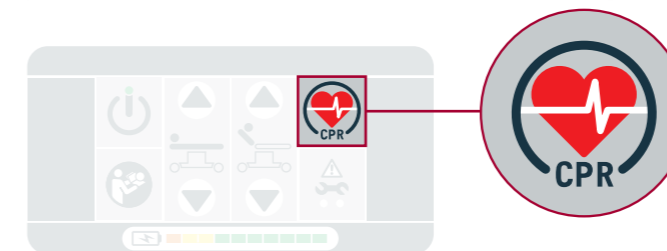

Backrest – electrically powered raise and lower mechanism

Positions the backrest anywhere between the vertical and horizontal for maximum patient comfort

Lights on the power panel illuminate to refer the user to the manual if the equipment is being used incorrectly or to indicate when maintenance is required

If a patient needs CPR treatment, there is no time to lose: the powered CPR feature returns the trolley swiftly to a horizontal, optimal height position for CPR treatment

Trendelenburg – hydraulically powered tilt mechanism

Extremely smooth and controlled movement, even at the trolley's lowest height

Special features for a trolley that's more powerful, by design

BUILD OPTIONS

QA3 <800> for Bariatric Patients

Increased platform/mattress – width: 800mm

Again recognising the trend for increasing patient weights and sizes, we offer special Bariatric versions of the QA3.

The extra wide (800mm) platform significantly increases the surface area for added safety and comfort for Bariatric patients.

As with all of our trolleys, the QA3 <800> is fitted with a K8 pressure care mattress.

Specially developed for this Bariatric trolley, the mattress core is made of high density foam, moulded with a unique castellated surface. This increases air flow within the mattress and helps to relieve pressure by distributing the patient's weight as evenly as possible across the surface area – particularly important for heavier patients.

Like other K8 models, the foam has antibacterial and microbial fungistatic properties and its latex-free, 4-way stretch polyurethane (PU) outer cover allows the skin to breathe – for greater patient comfort.

Finally, our unique ultrasonic sealing system effectively welds the seams of the outer cover material together to give an almost unbreakable seal, making the K8 a class leader in infection control.

 All models of the QA3 Emergency Trolley have a weight capacity of 320kg and can be fitted with this increased platform width

ACCESSORIES

K8 Pressure Care Mattresses

Pressure care and infection control are top priorities in a trolley mattress – and Anetic Aid’s independently tested K8 pressure care mattress addresses both of these vital factors.

At its core is high density foam, uniquely specified by Anetic Aid. This means that the mattress can be thinner, while still offering the same, if not better, pressure distribution than a thicker, less sophisticated foam. This is particularly important with tables and trolleys, as it means the overall height can be kept as low as possible for easy access by frail or elderly patients.

A layer of thermally responsive gel-feel memory foam is then added, further relieving pressure by distributing the patient’s weight as evenly as possible across the surface area – whatever their position.

Infection control

Both of the foam elements of the mattress have antibacterial and microbial fungistatic properties, while its latex-free, 4-way stretch polyurethane (PU) outer cover is anti-microbial, water resistant and vapour permeable. This means it is not only contamination-resistant, but it also allows the skin to breathe – for greater patient comfort.

Finally, a unique ultrasonic sealing system effectively welds the seams of the outer cover material together to give an almost unbreakable seal, making the K8 a class leader in infection control.

In the science of Kinetics, there are eight points of contact the human body makes when lying on a hard surface – hence K8.

Description	Code

Accessories for radiographers

As well as our Lateral Cassette holder, we offer three additional items to aid patient positioning and help radiographers achieve the best possible image outcomes.

Carrier Tray – allows for easier loading and positioning of detectors (cassettes) – while also helping to protect them from accidental damage

Wallace Support – facilitates positioning of cassette for Modified Axial (Wallace) View patient shoulder X-rays. Consists of two props which attach to Side Rail with spring-loaded quick release handles

Support Shelf – for easy and secure positioning of cassette for patient chest X-rays
