HEINE DELTA X Dermatoscope

The entry point to professional standards. Everything you need for dermatoscopy – in a compact design.

Intuitive and ergonomic

- Small instrument head and proven contact plate design – facilitates access to the examination area
- Ergonomic handling thanks to the angled handle
- Compact – ideal for mobile use

Toggle function

Alternate between polarised and non-polarised light with the push of a button
More information: heine.com/en/Toggle

Additional light

For viewing the skin before the dermatoscopic examination

Smart power source options

- Charge status indicator
- Automatic switch-off function
- Rechargeable with USB-C via cable or charging station

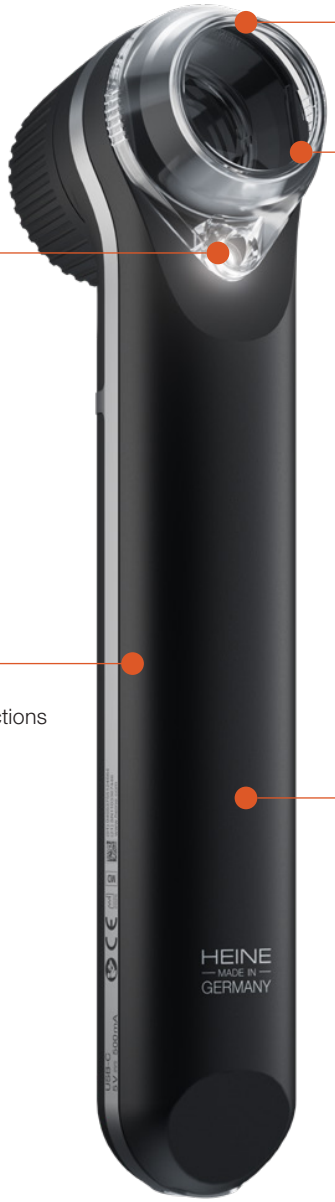

Extremely sharp image, selectable polarisation eliminates reflections and glare

- Crystal clear image due to achromatic HEINE optical system
- Homogeneous, bright exposure with true colour rendering thanks to LED[HQ]
- 10x magnification
- Field of view 14 mm (lens 16 mm) Ø
- Focusing optics (dioptre correction)

Options for digital documentation

- Easy capture of digital images with the smartphone adapter (optionally available) for documentation or for a second opinion
- Convenient and intuitive image and data management with the HEINE DERManager

HEINE DELTA X
Dermatoscope

Contact plates for multi or single use

- Contact plates made of high-quality optical polymer – for safety in hygienically problematic applications by replacing the contact plate
- Secure hold of the contact plate with the bayonet lock
- Quick change from contact to non-contact examination – simply remove the contact plate

Additional light for an overview before the dermatoscopic examination

- For viewing the skin before the dermatoscopic examination through the lens
- Homogeneous, bright illumination with true colour rendering

Optional: Contact plate with scale made of scratch-resistant glass

- For long-term use

smooth SURFACE

Safe, hygienic reprocessing thanks to smoothSURFACE and recessed connections

Product data

Durable and lightweight thanks to optimal material selection

- Solid integrated aluminium frame
- Housing is thermo-moulded out of a special high-impact material blend optimised for hygienic reprocessing
- Lightweight and precisely balanced
- LED[HQ]: Virtually unlimited durability and constant performance due to special thermal management (aluminium heat sinks)
