INNOVATIVE UV THERAPY FOR DERMATOLOGY

medisun[®] 2800 Innovation

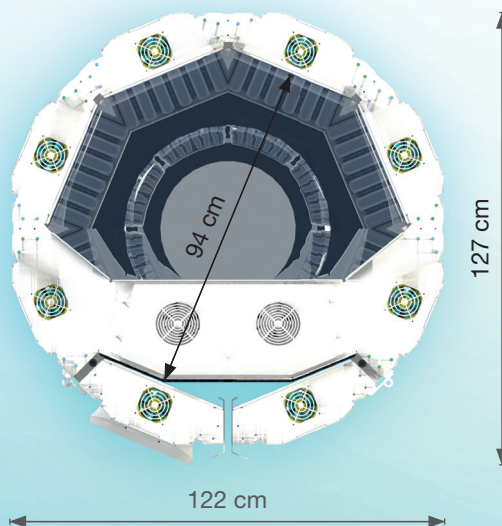

PROFESSIONAL WHOLEBODY THERAPY

medisun[®] 2800 Innovation is the new technology standard for UV treatment of the whole body with UVB-311 and UVA. The operation is carried out with a modern touch-computer. Exposures with UVA, UVB-311 or a combined spectrum are possible. A version with UVA-1 mono spectrum is also available. The UV lamps are arranged in an ergonomically optimized way. A newly developed software in connection with an intelligent lamp control improves the dose accuracy compared to conventional UV cabins.
