

Bovie Derm 942 - High frequency coagulator Monopolar/Bipolar

PRODUCT REFERENCE: A942

Designed for years of trouble-free use

The Bovie Derm 942 is the most reliable and durable desiccator available today. Its lifetime is extended by using the latest chip technology and reducing the number of internal parts, thus generating less internal heat. Post-procedure and long-term cleaning are simplified by the non-absorbent, non-staining, high-impact plastic housing.

- 40 watt power
- Higher resolution in bipolar mode: increase and decrease in 1/10th watt increments from zero to ten watts
- Universal power: with 100-240 VAC... the A942 is a global option.
- More user-friendliness with functions that can save you time and money
- Less to do: with fewer steps to perform the same procedures
- Less to buy: fewer accessories needed for added functionality
