

Sterilizer Melag - Euroklav 23 VS+

The Euroklav 23 VS+ is especially suitable for practices that want to sterilize longer instruments because it has a chamber volume of approx. 23 litres (depth of chamber is 45 cm).

The Euroklav 23 VS+ features four "Class S" programs for sterilization of unwrapped or wrapped instruments and textiles. The powerful and efficient vacuum pump creates a simple pre-vacuum for safe removal of air before sterilization and for optimal post-drying of the instruments after sterilization. The modern electronic design permits versatility in batch documentation, by integrating with the network and MELAtrace, through the compact flash card or as well as with the known MELAprint 42 log printer.

Features:

- More space for instruments thanks to longer sterilization chamber
- Safe pre- and post-vacuum, short operating times
- Documentation interface
- Stand-alone with effective air-cooling system

Starterpackage contains:

- Euroklav 23+
- Tray holder A plus
- 2x Trays
- 1x Foil holder

Features

Class	B
Device type	vrijstaand (extra waterbehandelingsapparaat kan worden aangesloten)
Load capacity	4 kg instrumenten - 1 kg textiel
Power supply	220-240 v
Power consumption	2300 W

Dimensions

Device (B x H x D)	42,5 x 49 x 70 cm - toestel past op een tafelblad van 60 cm
Chamber (W x H x D)	45 cm lang x Ø 25 cm
Chamber volume	23 l
Weight	45 kg
