

## Colorimeter DSM 4

PRODUCT REFERENCE: DSM 4

### Be the expert with accurate skin color measurement

Gain more clients by demonstrating your expert knowledge with valid data. Deliver accurate and detailed color measurements with the Colorimeter DSM-4 - your most professional quality tool for skin color assesment.

### 4 simultaneous skin color measurements with 1 instrument

The Colorimeter DSM-4 is based on the newest technology and provides you with accurate skin optimised measurements for percieved color, pigmentation, and erythema simultaneously and at the same location.

The colorimeter is able to detect extremely small color changes in the skin, and it is ideal for evaluation of skin eg. before and after laser treatments. The colorimeter is highly recognized in both research studies and in pharmaceutical and cosmetic efficacy testing.
