

Electric mobile operating and transport table QA4™ Anetic Aid

The QA4™ Mobile Surgery System is the perfect combination of transport trolley and operating table with remote controlled electrical functions.

- Exceptionally low height
- Removable headrest
- Removable rotating side rails
- Electric drive
- Press on/off 5th wheel steering
- Polyurethane tyres provide low rolling resistance for great manoeuvrability
- Full coverage C-arm

Benefits

- Superior access to the operation and exceptional stability.
- Less manual handling
- Shorter turnaround time between operations
- Reduced risk of cross-infections
- Fewer different devices for surgical specialties
- Higher efficiency
- Transport - Treatment - Recovery - Safe - Effective - Proven

Further information

- Min. height 605 mm (excl. mattress)
- Max. height 1005 mm (excl. mattress)
- Dimensions L2100 x B800mm
- Weight 160kg
- Maximum patient weight 250kg

Features

Hight adjustment	electric
Removable headrest	✓
Elektrisch verschuifbaar tafelblad	horizontal
Push/pull bar	✓
