

EMR-validated handrail scale with generous platform Seca 645

The seca 645 handrail scale gives people who are unsteady on their feet the opportunity to hold themselves up. This will reduce the workload for staff and prevent dangerous falls during weighing.

- Safe weighing due to sturdy handrail
- Large non-slip platform with 300 kg capacity
- 360° swivel display for easy reading
- With a BMI calculator and damping system
- Mobile due to transport wheels
- EMR-validated: transmit measured data directly to any electronic medical record system or printer

The all-round handrail of the seca 645 reduces the risk of falling for elderly patients, or those with impaired mobility. The scale offers secure support for anybody with restricted mobility. This helps take the burden off of staff, giving them more time to focus on the patient. The weighing platform is very large, low-threshold and therefore easy to enter. For people who can only stand briefly, a chair is set up for them so they can be weighed while sitting (tare weight of chair deducted).

Features

Approval class	III
Weighing capacity	300 kg
Scale (g)	100 g < 200 kg > 200 g
Power supply	piles rechargeables, adaptateur secteur
Overload protection	✓
Tarra	✓
Pre-tarra	✓
Automatic Pause	✓
Automatic switch-off	✓
Wireless Interface	✓
Transport casters	✓

Dimensions

H x L x W	115 x 64 x 66 cm
Weight	25,4 kg
