

Device for pre-sterilization Hydriade Fast

Device for pre-sterilization:

Hydriade Fast is the first automatic pre-sterilization device. Designed for use with all specialties, Hydriade Fast 4-in-1 performs all the major preparation phases for the sterilization cycle:

- Simple to use: Just run the desired programmable cycle : Disinfection, ultrasonic washing, rinsing and drying. Just run the desired programmable cycle.
- Health and safety: Conforms to the sterilization process and presents no risk to operator.
- Reliability: Eliminates chemical, bacteriological and infection risks.
- Saves time: Runs the process automatically for more time devoted to care.
- Saves money: Ensures longer lasting instruments & lower equipment costs.
- Saves space: Reduces the sterilization chain to 45cm³.
