

Storage and distribution systems H+H Flexshelf

The FlexShelf is a flexible shelf system that meets all requirements.

It can be assembled in any way desired. Whether a few shelves are needed for storage, a complete workspace is expanded or a mobile unit on wheels is required - anything is possible.

Choose from a wide range of built-in components and accessories such as modular ISO pull-outs, drawers and shelves.

By integrating worktops or pull-out shelves, the FlexShelf can be transformed into a workstation.

If the FlexShelf is already in use, it can still be modified. The location of the drawers can be adjusted without tools. Thus, modular bins, accessories and even drawers can easily be snapped onto the FlexShelf somewhere else.

With the FlexShelf, keeping everything in order has never been easier.
