

Bovie Specialist PRO - High Frequency Electrosurgical Generator - 120 Watt

PRODUCT REFERENCE: A1250S

Affordable electrosurgery device with multifunctional features including a modern push-button design and is suitable for most monopolar and bipolar surgical procedures. With 5 energy outputs and up to 120 watts of power, the modalities include Cut, Blend, Coagulation, Fulguration and Standard Bipolar.

The device is designed with reliable safety features such as BovieNEM™ (Neutral Electrode Monitoring) path detection technology, BovieDED™ (Digital Error Detection), audible warning tones and self-test circuits.

Output power:

- Cut (120 watts)
- Mix (90 watts)
- Coagulation (80 watt)
- Fulguration (40 watt)
- Bipolar (30 watt)
