

CryoPen M

PRODUCT REFERENCE: S-HO-CMPE-01

The perfect cryosurgery tool for removing small or superficial benign lesions such as sun spots, age spots, skin tags and small warts.

CryoPen M is suitable for less-frequent use or for smaller/superficial lesions.

Typical users are General Practitioners, Dermatologists, Pediatrics and Estheticians.

CryoPen M is also suitable in a mixed medical practice where several practitioners share the tools and want a variety of different devices.
